To MEODENTAL  
Dror Kanion

Dear Sirs,

Following a one year experience with Meodental White + professional, we find the kit most beneficial in several aspects:

1. Easy and time saving patient preparation – convenient both to the dentist and to the patient.
2. The bleaching result is visible after a 30 min. cycle of light exposure. In cases of extreme staining, adding a 15 minutes treatment of the "intensive" program improves results.
3. Non-painful procedure – very few patients reports of sensitivity, both during treatment and post-operative.
4. Long lasting results – combined with home bleach materials, the result is very stable.

The results are excellent and most agreeable to our patients.

Sincerely,

Dr. Galit Talmor
